

## Transfer Line Marking Machines

Supaturf prolific range of sports line marking machines offer machines to suit professional and amateur grounds man's needs. Used worldwide our line marking machines are equally at home in all environments, from International stadiums to village greens, machines that will not break the bank while giving many years reliable service.

Our British built line marking machines are built at our Leicestershire head offices by our dedicated team of technicians, as with all our products they meet our stringent standards for performance and quality.

Hand building our line marking machines in the UK by our own highly skilled staff allows us to control production at all stages, from receiving the raw materials necessary for the construction of our machines, to final assembly and testing.

Supaturf line marking machines built with simplicity in mind.

Simple to use, our machines are lightweight, easy to push while rewarding the operator with many years reliable service.

Simple to clean after use.

Simple to maintain, all parts are available from our extensively stocked spares department.

Simple is personified by our unique tool less pump removal feature, common to all current generation machines – means no tools needed and no more grazed knuckles.

Simple parts management, commonality of parts across our range of machines, improves part identification and helps to keep our pricing competitive.

## Briteliner 400

“The Original Box Marker” like all of our line marking machines it features pneumatic tyres making it simple to use, gliding through adverse conditions. The Briteline 400 is a firm favourite with the traditional groundsman.

## Briteliner Arrow

You can't reinvent the wheel they said. However, with the Briteliner Arrow we have had a good try. Featuring its lightweight construction, easy cleaning and transportability, the Briteliner Arrow is becoming the transfer wheel line marker of choice worldwide.
