Introduction

SUPATURF LINE MARKING GUIDE

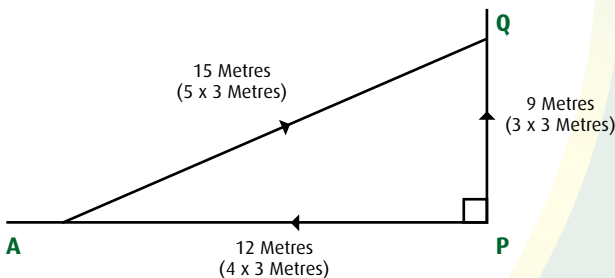

Welcome to the new edition of the Supaturf Line Marking Guide.

The guide provides marking-out information for many of the most popular sports as well as some of the up and coming sports. You can download larger versions of all the diagrams provided in this booklet together with specifications and detailed information for a wider range of sports from our website at www.supaturf.co.uk

Every endeavour has been made to ensure the information provided is accurate and the booklet has been produced with reference to relevant sports bodies wherever possible. However, it is presented as a guide only. Supaturf can accept no responsibility for its complete accuracy as specifications can change. We advise that, where fields to be marked out to the latest specifications, you check accuracy with the relevant authority.

PYTHAGORAS THEOREM (3:4:5)

With the zero end of the tape at P, take the 36m mark on to the tape A which lies on the marking line. Take the 9m mark on the tape in the hand and, ensuring the tape is firmly held at A and P, pull both parts of the tape taut to Q. $APQ = 90^\circ$.

Step up to Supaturf Linemarking

Supaturf Linemarking machines and purpose-developed linemarking liquids provide the complete solution to the provision of high quality, accurate and highly visible lines at any sports venue – from international stadia to local, village pitches.

SUPATURF LINEMARKING MACHINES

Briteliner Arrow:

The latest development in transfer wheel technology. Simple, economic and very effective

TXE 252 and 505:

Lightweight, efficient spray markers. Ideal for venues with multiple pitches

Xcel:

No compromise line marking technology with finger tip control of dilution rates

TLS:

Advanced machine with 30 litre line marking liquid tank and built-in wash tank

Comprehensive ranges of accessories and spares for all line marking machines.

SUPATURF LINE MARKING LIQUIDS

Whatever the requirement, from bright, white lines for a televised event to economical, long lasting lines on multi-use local sports pitches, Supaturf provides the ideal solution.

SupaStadia Eco:

New generation liquid capable of producing the highest quality lines. Can be diluted to 1:20

SupaStadia AF:

Ideal for high profile venues where only the best will do

SupaStadia:

Benchmark product. Superior performance for professional users

Stadia:

Pioneering, water-based marking liquid. Product of choice for those with large areas to be marked

Sport:

Ideal choice for economic bulk marking

Briteline Plus:

Utility liquid providing high performance at low cost

Stadia Colours:

Coloured lines or logos and advertisements on grass. Range of colours available

Supaturf RTU:

Quality line marking liquid in a ready-to-use formulation. No mixing. Stir and it's ready to mark

Briteline:

Developed for use with transfer wheel markers. High whiteness and excellent adhesion to grass

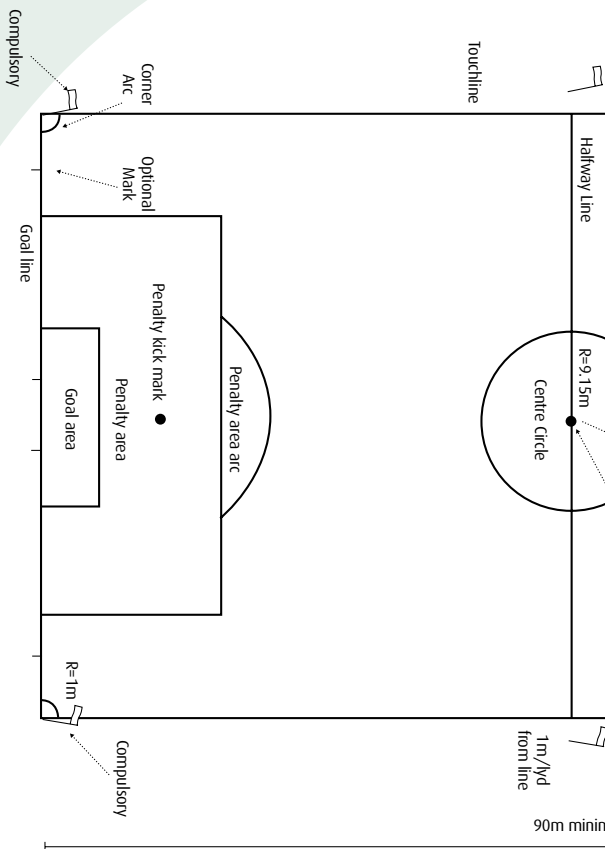

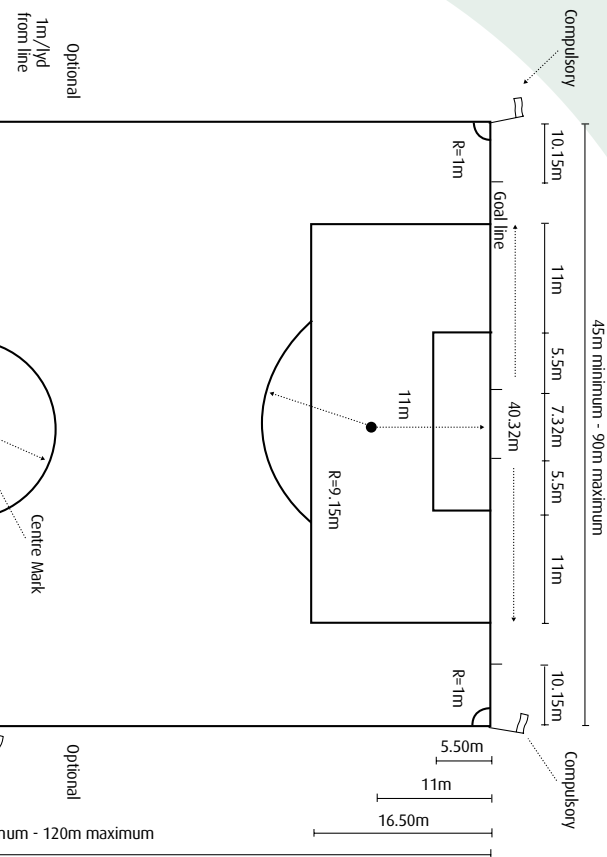

SupaMark Aerosols:

Marking liquids in aerosol canisters for indoor and outdoor use on all surfaces. Eight colours available

Range of hard and multi-surface products also available.
