

SPECIALIST PRODUCTS FOR  
**LINE MARKING**

***Supaturf***

2021

## Introduction

Supaturf is part of Vitax Amenity and the larger group that is Vitax Limited - a family-owned, Fourth-generation British business which has been manufacturing Amenity and Horticultural products for over 100 years.

Based in the UK, Supaturf has established a reputation for producing a comprehensive range of products which are developed to the highest quality and cost-effective.

Building a bond of trust with its clients both in the UK and overseas, Supaturf is a key supplier and manufacturer of products specifically aimed at the professional sports market, with particular expertise in line-marking machinery and paints.

Working with sports clubs and the sports turf industry, Supaturf is able to offer an exceptional level of expertise to all line-marking requests.

Supaturf and Vitax Amenity combined are able to provide everything that the Amenity and Sports Turf industries need, ranging from fertilisers, control chemicals, wetting agents, line-marking, spreaders and sprayers.

Widely used in many countries across the world, Supaturf is backed with a dedicated team of UK-based technical experts who are happy to provide customers with any support they need.

# Line Marking Liquids

## Briteline

Specifically formulated for use with transfer-wheel (box type) marking machines such as the Supaturf Briteliner 400 and Briteliner Arrow.

The liquid is formulated with special binders that ensure it adheres to the grass leaf to provide superior performance over conventional whitening powders.

- Free flowing.
- High whiteness factor.
- Adheres effectively to the grass leaf.

**Dilution rate: Up to 1:3**

**Pack sizes: 12.5 litres, 600 & 800 ltrs**

## Briteline Plus

A utility line marking liquid that provides reliable and consistent performance at an economical price. Briteline Plus can be applied via transfer-wheel and spray markers.

- High performance at low cost.
- Ideal choice for contract marking.
- Formulated to stick to grass leaf.
- Compatible with a variety of machine types.

**Dilution rate: Up to 1:4**

**Pack sizes: 12.5 litres, 600 & 800 ltrs**

## Ready-to-use

Pre-mixed in our factory and ready-to-use, straight from the drum. Simply agitate the drum and pour into your marking machine.

- No measuring or mixing needed.
- Ensures reliable and consistent performance.
- Top quality, bright white lines.
- Excellent durability.
- Suitable for spray and transfer-wheel markers.

**Pack sizes: 10 litres, 600 & 800 ltrs**

## Sport

Developed as an easy-to-use, economical water-based marking liquid. The product of choice for weekly or frequent multi-site marking where budgets are restricted.

- Ideal for economical bulk marking.
- Specially developed for frequent application.
- Very easy to use and very cost effective.

**Dilution rate: Up to 1:6**

**Pack sizes: 12.5 litres, 600 & 800 ltrs**

# Line Marking Liquids

## Stadia

A technically well balanced formulation for those who are conscious of cost but still require premium appearance.

Popular with many local authorities and contractors with multiple grounds and/or large areas to mark. Stadia delivers a high standard of line whiteness combined with excellent longevity.

- Classic marking liquid.
- Outstanding performance combined with good economy.
- Produces lines with excellent longevity.

**Dilution rate: Up to 1:7**

**Pack sizes: 12.5 litres, 600 & 800 ltrs**

## SupaStadia

SupaStadia is recognised as the benchmark product for line marking. It delivers superior performance for professional users, produces excellent whiteness and has the stamina to outperform alternative products.

- Superb results for professional venues.
- Outstanding whiteness and longevity.
- Good shelf-life stability.

**Dilution rate: Up to 1:8**

**Pack sizes: 12.5 litres, 600 & 800 ltrs**

## SupaStadia Extra

SupaStadia but with that extra factor. Whiter and brighter than our market leading Supastadia for when the game really matters. A cost effective alternative to our high intensity SupaStadia AF paint.

- For vivid lines even under harsh bright daylight.
- High value, low cost for when you need that little Extra.
- Perfect for prestigious events requiring immaculate appearance.

**Dilution rate: Up to 1:7**

**Pack sizes: 12.5 litres, 600 & 800 ltrs**

Supaturf marking liquids are also available in 800 litre bulk tanks that offer distinct advantages to groundcare contractors and others with multiple pitches and grounds to maintain.

**Bulk tanks are:**

- Delivered in shrink-wrapped, robust, wet-strength Kraft containers.
- Elevated on pallets with spout extension for ease of use.
- Approved by the International Safe Tansit Association.
- Made in totally recyclable packaging.

# Line Marking Liquids

## SupaStadia AF

For use where only the best will do! SupaStadia AF is the line marking liquid developed for high profile venues and important events. A huge step forward in marking liquids, SupaStadia AF delivers the highest quality white lines expected for televised events at major stadia.

- Takes line marking to a higher level.
- Produces outstanding lines required in high profile venues.
- Excellent quality and value.
- Consistent brilliance under harsh floodlighting.
- Lines appear vivid and bright when televised.

**Dilution rate: Up to 1:10**

**Pack sizes: 12.5 litres, 600 & 800 ltrs**

## SupaStadia Eco

A highly concentrated, free-flowing marking liquid that delivers outstanding results combined with environmental and practical advantages such as less packaging, less waste and easier storage.

- Outstanding whiteness performance.
- Advanced formula.
- Eco-friendly and cost effective.

**Dilution rate: Up to 1:20**

**Pack size: 5 litres**

## SupaShots

Designed to give a whiteness boost to SupaStadia and SupaStadia Extra liquids.

- Increases brilliance of standard liquids.
- Ideal for big events at smaller clubs.
- Big stadium results at a fraction of the cost.
- One SupaShot gives a boost to 12.5 litres of standard liquid.

**Pack size: 1 litre**

# Line Marking Liquids

## Stadia Colours

Smooth, flowable marking liquids containing blends of water-dispersible coloured pigments, that provide excellent colour coverage when applied to turf and a wide range of other surfaces.

Stadia Colours have been specially formulated to create sponsor logos and advertisements on grass or alternative surfaces and have been used successfully at major venues throughout the world.

The liquids are also used where the requirement is for coloured rather than white lines and Stadia Green is often used to cover over existing white lines in multi-sport stadia.

- Excellent durability and scrub resistance.
- Ideal for application via the TXE or TFS spray marker.
- Can be applied by brush or roller.
- Five standard colours, with special colours by arrangement.
- Safe to use on grass - will not harm turf or affect the soil.
- Ideal for winter sports line marking.
- Can be used effectively on hard surfaces.

### Standard Colours

Stadia Colours are available as standard in:

- Red
- Blue
- Green
- Yellow
- Black

Pantone-matched and specific colours can be produced on request.

**Pack sizes: 12.5 litres, 600 & 800 ltrs**

### Dilution rates:

General usage	1:4
Heavy coverage	1:1
Stencil coverage	1:2

## SupaTints

Create your own colours using the SupaTint range.

- Ideal for use with Supaturf Ready-to-use or any diluted concentrate.
- Available in blue, red and yellow.

**Pack size: 0.5 litres**

# All Surface Marking

## Supamark

Solvent based, xylene-free, line marking aerosols.

- Produces strong, durable marks.
- Use indoors or outside on all types of hard surfaces including tarmac, concrete, brick, synthetic turf, wood, metal and shale.
- Can also be used safely on grass surfaces.
- Touch-dry in 15-20 minutes.
- Resistant to petrol and grease.

**Pack size: 750ml.**

**A 750ml aerosol will produce a 100m x 50mm line.**

Available as standard in:

- Black
- Blue
- Yellow
- Red
- Green
- Orange
- White

## Supamark Extra

Solvent based, xylene-free, line marking aerosols with added pigments for even brighter lines.

- Produces strong, durable marks.
- Use indoors or outside on all types of hard surfaces including tarmac, concrete, brick, synthetic turf, wood, metal and shale.
- Can also be used safely on grass surfaces.
- Touch-dry in 15-20 minutes.
- Resistant to petrol and grease.

**Pack size: 750ml.**

**A 750ml aerosol will produce a 100m x 50mm line.**

Available as standard in:

- Black
- Blue
- Yellow
- Red
- Green
- Orange
- White

# All Surface Marking

## Supamarker PRO

Enhanced design for easy and accurate marking of all kinds of hard surfaces.

- Four wheels for greater stability and precise control.
- Simple and effective trigger control for spray.
- Equipped with 2" precision plate for crisp clean lines.

## GUR

Simplicity itself, the Supaturf GUR marker (Ground Under Repair) will fit any aerosol and give a steady platform to mark out any "GUR", "Out of Bounds", hazards on the golf course or for any other sports line marking. Easy to use with incorporated marking discs, you will achieve a well defined and clear line on every application.

- Easy to use.
- Powder Coated steel construction.
- Easy to carry.

## Stencils

Ideal for marking out car parks, parking bays, sportsfields and playgrounds.

### Car Park Stencil Kit

10 stencils to make accurate marking out of a car park fast work.

Stencil	Dimensions
Arrow	530 (w) x 380 (h)
Curved Line	530 (w) x 60 (h-left) 110 (h-right)
Disabled Symbol	480 (w) x 790 (h)
In & Out	Letter size - 250 (w) x 485 (h)
Parking	680 (w) x 250 (h)
Reserved	810 (w) x 225 (h)
Stop	820 (w) x 400 (h)
Straight Line	410 (w) x 140 (h-left) 110 (h-right)
Visitors	840 (w) x 250 (h)

### Numbers Stencil Kit

Contains numbers from 0 to 9 in two sizes.

# Line marking machines

## TXE 606 and TXE 353

One of the world's most popular battery-powered line markers, the TXE features a range of new, customer-driven design features that deliver greater functionality, performance and control while making cleaning and maintenance even easier.

Two machine options are available -

**TXE606**, equipped with a 22 amp/hr battery for up to 5 hours use on one charge, enough for up to 15 football pitches.

**TXE353**, equipped with a 9 amp/hr battery for up to 2 hours use on one charge, enough for up to 6 football pitches.

### Both machines feature:

- Four wheels for greater stability and fully adjustable handles for precise control.
- Simple, thumb operated 'on-off' spray control.
- Easy-to-adjust line-width.
- Easy to line up and provides clear visibility when spraying.
- Compatible with detachable spray lance.
- Side spray attachment and marking discs are available as optional extras.

### TXE machines offer the following benefits:

- 25 litre tank (enough for up to 2 full size football pitches).
- Line widths from 1" to 5" (2.5 - 13cm).
- No noise or pollution.
- Easy-to-use, handlebar-mounted controls.
- Reinforced side frames for added strength.
- Fold-over handlebars for easy transport and storage.

## TXE 606 Pro and TXE 353 Pro

These models come complete with a factory fitted flush tank and return to tank facility.

- 2.5 litre flush tank uses clean water to flush filter, pump, spray lines and spray head.
- No need to empty tank between jobs or sites.
- Prevents build-up of residues to help prolong the working life of the machine.
- 'Back-to-tank' system enables pressure at spray nozzle to be adjusted to suit conditions.
- 'Back-to-tank' system also agitates liquid in the main tank to help deliver consistent line colour.

# Line marking machines

## TFS25 (tank free system)

The efficient, robust and easy-to-operate Supaturf TFS25 comes complete with 2 x 12.5 litre drums. The first, equipped with dilution marking guides, is for marking liquid, while the second is for clean water to flush the system once marking has finished.

The simple to use marker guides at the front of the machine can be simply adjusted from 50mm to 120mm.

- Ideal for use with Supaturf Ready-to-use and conventional concentrated line marking paints.
- Robust, perfectly balanced and effortless to operate.
- Easy-to-use marking guides.
- Lightweight and easy to transport.
- Easy-flush system makes cleaning and maintenance simple.

Contractors and councils will warm to the convenience of the TFS system, which is built on Vitax Supaturf's tried and trusted components from the designs of previous machines.

## TXE and TFS Service Kit

Keep your TXE or TFS in superb condition. Compatible for all of our spray line marking machines, our service kits provide everything you need to keep your machine in optimum working order.

- Applicable to both TXE and TFS range of machines
- Selected components to prolong optimal performance

# Line Marking Machines

## Briteliner Arrow

The Briteliner Arrow, a revolutionary transfer-wheel marking machine, now featuring a series of design enhancements that further improves performance and usability.

Developed as the successor to the original box markers, the Briteliner Arrow is lighter, tougher, easier to clean and more accurate. Once set, the Arrow will produce the same quality line, time after time. Ideal choice of machine when budgets are restricted but also the perfect tool for creating stand-out lines for big games at major venues.

- Longer wheel base and better weight distribution for consistent and accurate straight line marking.
- Adjustable transfer wheel to achieve required line definition.
- In-built facility to ensure easy and accurate circle marking.
- On-board brush for penalty/centre circle spot marking.
- Streamlined tank moulded from ultra-strong plastic which holds enough liquid to mark out up to two full sized football pitches.
- Tip-tank feature makes after-use cleaning easy and allows unused marking liquid to be saved.
- Tank is easily removed for thorough cleaning.
- Triple coated steel tube frame.
- Light weight means it can be easily operated and lifted by one person.
- Range of wheel width options available (3", 4" and 5").

## Briteliner 400

Tried and trusted by groundsmen, the Supaturf Briteliner 400 box marker is still available to those who prefer traditional line marking methods.

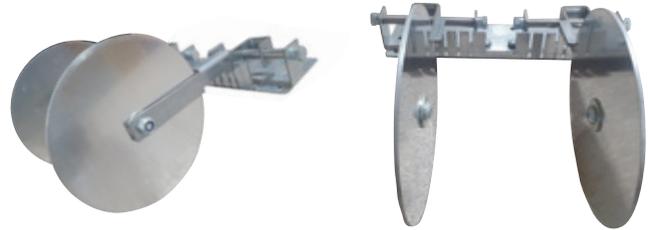

- Simple but effective line marking.
- Hollow transfer wheel allows user to increase/decrease weight to preference.
- Liquid tank built from rugged steel plate.
- Equipped with large pneumatic tyres for extra stability and ease of use.
- Height adjustable handle in tubular steel.
- Choice of marking wheel widths (2", 3" and 4").
- Inbuilt facility to aid accurate circle marking.

## New Marking Discs

Our new and improved marking discs have precision cut grooves that ensure that your lines will be an exact 3, 4 or 5 inches wide at all times. The unique shape of the blades makes sure that they will glide with ease over any terrain, keeping your lines straight, accurate and sharp.

- Compatible with the TXE 606 and TXE 353 and TFS25.
- Precision cut.
- Tough, durable metal construction.
- Pre-set adjustable width settings to meet current and future FIFA & FA regulatory widths.
- Easy to adjust.

## Marking Discs

Available for our legacy line marking machines, namely the TXE 505 and 252.

- Compatible with the TXE 505 and 252
- Precision cut.
- Tough, durable metal construction.
- Pre-set adjustable width settings to meet current and future FIFA & FA regulatory widths.
- Easy to adjust.

## Athletics Attachment

Essential for any groundsman needing to mark out athletics tracks quickly and easily with either the Supaturf TXE or TFS line marking machines, providing capability to mark three lines simultaneously.

- Produces three parallel lines in a single pass.
- Ideal for creating athletics tracks on grass.
- Accurate line marking in a fraction of the time.
- Just five minutes to fit to the machine.

When purchasing for TXE 606 or 353, additional attachment kit (part 14500) is required (sold separately).

## Spray Boom

For those looking for a convenient option for spraying liquid fertiliser without resorting to a dedicated spray machine. The Spray Boom will attach quickly and easily to either the TXE or TFS machines.

- Converts line marking machines into efficient power sprayers.
- Provides an even spray through three special nozzles.
- Handles liquid fertilisers, herbicides / pesticides and other liquid turf treatments.
- Installed in minutes.

# TXE Accessories

## Side Marking Attachment

Designed for those that prefer the side marking method when marking a line. With this in mind we still offer a side marking bracket which will fix to any of our spray line markers. Durable metal construction, the arm extends to provide a steady line marking platform.

- Built from durable steel
- Steady platform
- Will fit all models of our spray line markers
- Optional extras include additional spray arm & variable width marking discs.

## Spray Lance

A handy alternative to the dedicated spray boom for spot treatment and occasional application of liquid fertiliser. Alternatively, can be used in conjunction with stencil kits when marking club logo's etc.

- Ideal for spot treatment of weeds and/or disease in turf.
- Increases the versatility of your line marking machine.
- Ideal for spot marking and when applying paint with stencil kits i.e. club logo's etc.
- Easy to install.

## MORAT

Easy to use and easy to store, this Marking Out Reel and Twine kit is an essential piece of any groundsman's toolkit.

- Marking-out reel and twine.
- 400 m of hard wearing, no-stretch twine.
- Quickly reeled in after use.

## PLiFiX

Permanent marking positions for any pitch, designed to be fit and forget, mow and weather resistant. Will save you time in measuring out and marking lines at the start of the season.

- System to provide permanent markers for ground marking.
- About 3cm of the mow-resistant fibres are left above ground.
- Available in packs of 25, colours available are blue, yellow and white.

## SupaFlush

Prolong the life and efficiency of your line marking machine with regular application of Supaflush in your cleaning and maintenance schedule.

- Non-ionic surfactant solution.
- Effective cleaning of marking machines.
- Provides a barrier to prevent build-up of residues from machines that have not been cleaned for some time.
- Regular usage prolongs the effective life of your machine.

**Pack size: 1 litre**

# Sprayers

## EvenSprey Pro

A battery powered, pedestrian operated spray machine with a 50 litre tank ideal for larger or multiple greens. The spray boom can be folded in three so it can fit through a standard sized doorway and the spray head has individual isolation functionality so as not to waste any product on the smaller, more narrow areas. The return to tank agitator ensures product is always mixed and does not settle at the bottom of the tank. NB: never use this function to mix the product – always pour pre-mixed product into the spray tank so as not to damage the sprayer.

- 2 metre spray-boom with a 2.5 metre spray width.
- 50 litre-tank.
- 5 spray nozzles.
- 3 quick change nozzle heads.
- Spray head isolator function.
- Multi nozzle spray heads.
- Return to tank agitator.
- Rechargeable 22 amp/hr 12V battery.
- Folding boom.
- Using a high pressure pump and pressure regulator, the Evensprey Professional is easily able to spray high water volume materials across all five spray heads, giving greater control to the user, without the drop in pressure.

## EvenSprey Club

This is the evolution of the pioneering EvenSprey 250, a battery powered, pedestrian operated spray machine with a 25 litre tank ideal for smaller greens. The handlebars fold down to make for easy transportation.

- 25 litre-tank with 20cm lid and filter.
- Anti-flip tank stops.
- 1500mm wide single independent spray boom.
- Storage clip for the spray boom.
- Rechargeable 9 amp/hr 12v battery.
- Ergonomically designed handlebars.
- Improved filter system.

## EvenSprey Club Service Kit

Keep your Evensprey Club or 250 in superb condition. These essentials packed service kits provide everything you need to keep your machine in optimum working order.

- Applicable to both the Club and 250 machines
- Selected components to prolong optimal performance
